

CORPORATE PROFILE

Chemicals, Reagents & Services

2024-2025

WHO WE ARE

EWR Sarl is a 100% locally owned Congolese company, founded in 2016 with the objective to supply critical equipment to the mines, local government, municipalities, and private industrial sectors. Years of experience, intellectual capital and a proven track record differentiate **EWR Sarl** and ensure the utmost piece of mind to the customer and end users.

EWR Sarl has succeeded in establishing itself in the manufacturing, distribution and technical support of these products and services. It has also excelled in establishing and maintaining productive relationships with its customers.

VISION

To be the industry's leading service provider through efficient, reliable and high-quality service delivery

MISSION STATEMENT

We combine our technology and worldwide engineering expertise to design and deliver solutions and services that optimise our customers engineering processes.

OUR VALUES

Excellence

Integrity

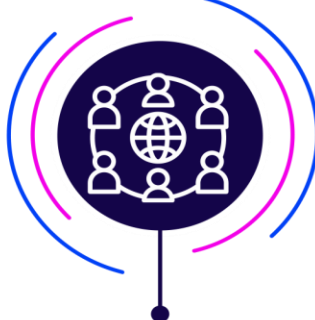

Respect

efficiency

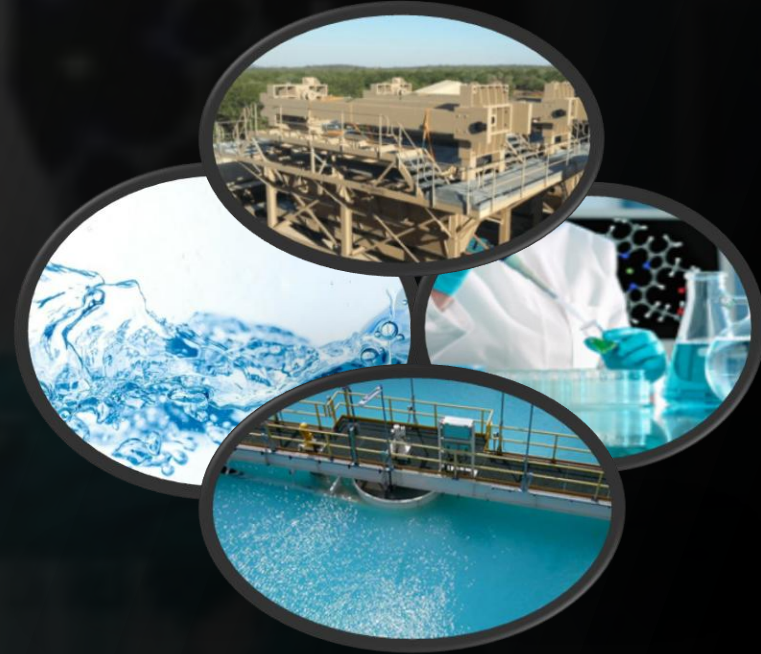

Team work

Social responsibility

Chemicals, Reagents & Services

The combined experience core competencies in the company provide EWR Sarl with the capability to serve customers in many different projects capacities and outsourcing of supplies. Our location in Lubumbashi, Kolwezi is critical to our short delivery lead times and customer service. Client can be comforted by our geographic proximity.

RELIABILITY

Over a half decade of combined experience in supplying customers has taught **EWR Sarl** to reduce time experienced by the customer to the minimum.

Time is money. When the customer loses time, we all lose money.

Our customers take comfort in the fact that **EWR Sarl** delivers on its promises, first time, every time.

Chemicals & Reagents

EWR with its partner **Strata Chemicals** provides reagents and chemicals to the mining industry.

The partnership comprises a team of specialists from various disciplines which include qualified, professionally registered engineers who have held various senior positions within multinational organizations.

We have a collective 165 years of engineering, chemical selection and supply experience in the potable water, industrial and mining industry which benefits our customers in terms of the correct selection of product to meet economic and engineering requirements.

EWR Sarl currently supplies flocculants and coagulants to the copper, coal, gold, uranium, nickel, ferro chrome and platinum industry. We boast a PAM product range of superior quality and are well priced according to market related standards.

- we are also suppliers of commodities and coagulants specific to colloidal silica removal. **Non-ionic, PAM Cationic and Anionic PAM, PAC, Polydadmac coagulant, Polydimdac coagulant, PEG Esters Colloidal Silica removal Polyamine coagulants, ACH and Coagulant Blends, Alums, blends, Sodium hypochlorite**

- EWR Sarl has extensive experience in supplying, commissioning and maintaining flocculant plants and thickeners. We believe this experience is essential in providing the most effective support to our clients.

- Chemical dosing plants
- Coagulant dosing plants
- Flocculant preparation and dosing plants
- Flocculant dosage optimizers

CHEMICALS, REAGENTS & SERVICES

- Static test work on-site or at our wet lab to identify the best-performing reagent for client application.
- Dynamic test campaigns should the client require them.
- Plant trials conducted by skilled engineers to evaluate, monitor and optimise processing.
- Monthly site/plant visits.
- Bi-monthly test-work campaign.
- Products dispatched within 72 hours of order placement.
- EWR Sarl representatives are always available on emergency call outs,

FILTRATION SERVICES

Liquid Filtration

With our continued drive to achieve zero-defects, Crosible has become a world leader in the supply and manufacture of filter press cloths, filter plates, filter presses, and other liquid filtration services and solutions.

Every product and material is carefully selected and constructed with precision to meet the highest international and ISO standards.

Dust Filtration

EWR has become a world leader in the supply and manufacture of filter bags, filter cages, Cros-Tex ePTFE membrane technology, and other specialised dust filtration services and solutions.

Every product and material is carefully selected and constructed with precision to meet the highest international and ISO standards.

Experience of Key Personnel

OLIVER DEAN

*Managing Director
Logistics Specialist*

(Sales, procurement and sourcing of mining equipment)

IRAD KAMWING

Operations Manager

(Sales, handling operations at the company and client liaison)

ARMEL CAIMALA

Conveyor Belts Specialist

(Belting and Corrosion Protection)

KEITH ILUNGA

Financial analyst

ALWYN BRONKHORST

Mechanical Engineer

(Key experience in generating piping specifications for the industrial and mining sector capital projects)

ASHLEY ERNSTZEN

Mechanical Technician

(Sales, maintenance and plant operational experience)

GLENN CULLEY

Chemical Technician

(Process plant commissioning engineer)
